**East Cheshire  
Hospice @Home**  
Here when you need us most

East Cheshire Hospice is your local hospice

All our services are funded by the generosity of the local community and are available to patients free of charge.

Less than 17% of our costs are covered by the NHS, so we have to fundraise £7,500 each and every day. If you'd like to know more about how we raise money and how you could help, please call our Fundraising Team on 01625 433477 or visit [www.eastcheshirehospice.org.uk](http://www.eastcheshirehospice.org.uk)

# East Cheshire Hospice @Home

Bringing our care into your home  
when you need it most

Given the choice, most of us would like to spend our final days in a place where we feel most at home. However, for many people this is not possible, due to limited resources which can lead to unwanted admissions to hospital.

We believe that people facing end of life should have the choice to receive care wherever they feel most comfortable. East Cheshire Hospice @Home has been developed to try and give end of life patients more choice and control. Our aim is to empower people to remain at home if they wish to, by offering high quality end of life care and support in the community.

We are here to respond if you need urgent assistance, advice or support out of normal working hours, providing you and your loved ones with complete peace of mind.

### How can we help?

The Hospice @Home team is made up of experienced specialist nurses and highly trained healthcare assistants, who can offer hands on practical and nursing support, to enable patients and their families who are coping with an end of life situation to remain at home whenever possible.

Our main role is to provide support during the evenings, nights and weekends, when other services are limited.

We've been serving the East Cheshire community for around 30 years, and we have the knowledge and expertise to deliver end of life care effectively and compassionately. We will also provide support and care for your family, carers and other loved ones.

### How do I get referred?

If you require extra support, please speak to your District Nurse, Macmillan Nurse, GP or hospital team, who can quickly refer you to the Hospice @Home Service.

### What can we offer?

Our service is available to people nearing the end of their life, and we are able to offer short term intervention. We can respond quickly to an out of hours crisis, to prevent you having to be admitted to hospital.

The care provided by the team will then be tailored to your specific needs and preferences, following an assessment by your District Nurse or a qualified East Cheshire Hospice @Home nurse. Our aim will be to stabilise your symptoms and offer support so that you can stay where you feel most at home.
